

Leadership commitment meeting

Time

1 hour

Objectives

During this meeting, you will introduce the Six Building Blocks Program to your organization's leadership and key staff to determine if they will commit to implementing improvements to opioid management using the How-To Guide. Leadership support is critical to successful implementation of improvements using the Six Building Blocks. If they want to commit, determine which approach is right for your organization: walking through the three stages step-by-step over 9-15 months, or doing the Fast-Track Assessment process for organizations with limited capacity or who have already completed significant improvement work.

Who should attend

- Person who will lead the quality improvement work (QI Lead)
- Medical Director and other leadership, as appropriate
- Potential clinician champion
- Clinic manager
- Other stakeholders, as desired (e.g., behavioral health provider, pharmacist, data manager)

Helpful website resources

The following resources can be found at www.improvingopioidcare.org.

- [Commitment Presentation](#) to use in introducing the program to your organization's leadership
- Articles about the Six Building Blocks for distribution to leadership and staff:
 - [Development of the Six Building Blocks](#)
 - [Effect on opioid prescribing](#)
 - [Effect on work life](#)

Agenda

Use the [Commitment Presentation](#) to cover the following topics:

1. Why is this work important?
2. What are the Six Building Blocks?
3. What do we need to be successful?
4. Which of the two pathways best fits our organization?
5. Decisions and next steps.

If after this meeting your organization is ready to commit and begin the work, open the appropriate next guide (Stage 1: Prepare and Launch Guide or Fast-Track Guide) to introduce and assign work to be done.
