Family Medicine Clerkship March EOQ Highlights

March EOQ *held virtually 3/18/22*

-SAVE THE DATES-
2022 EOQs
In person!

- **June 3-4**
- **October 14**

March EOQ: Thank You!

Thank you to everyone that made time to join the Zoom meeting! It was great to receive updates from everyone and connect virtually. We had an update on Pediatric Urgent Care Practice Guidelines from Rebekah Burns, MD and a talk on Providing Hope in Medical Care from Ashwin Rao, MD. Recent third year students offered insights into giving formal and informal feedback. Additionally, Drs. Misbah Keen and Joel Carey provided a Best Practices talk for new preceptors.

Rebekah Burns MD

Associate Director, Pediatric Clerkship-Outpatient Core

Associate Professor of Pediatrics

Ashwin L. Rao MD

Program Director, University of Washington Sports Medicine Fellowship

Missed our March 18 EOQ or want to revisit it? **Watch the full EOQ meeting here**: https://www.youtube.com/watch?v=rnuG3QXYwLg

A big ongoing **thank you** to all preceptors for your energy and time with our clerkship students. The Family Medicine Clerkship could not exist with you!

Clerkship Updates

Changes have been made to the grading rubric for student Final Exams:

- Final Exam Honors Cutoff: Decrease from 78 to 75 (44th percentile).
- Final Exam Passing Grade: Increase from 57 to 60 (3rd percentile).

COVID-19 Updates:

- Masks are now optional at UW Medicine sites, however other sites still have the option to require students to wear masks.
- Students are required to have COVID-19 Vaccine Booster shots.

Questions about anything? Feel free to reach out the Family Medicine Clerkship Team:

Max Keyes - Program Manager - fmclerk@uw.edu
Misbah Keen - Director - mkeen@uw.edu
Toby Keys - Associate Director - keyst@uw.edu
Joely Carey - Assistant Director - joelcar@uw.edu

Family Medicine Clerkship October EOQ Highlights

March EOQ *held virtually 3/18/2022*

-SAVE THE DATES-
2022 EOQs
In person!

- **June 3-4**
- **October 14**

Student Panel

Associate Director Toby Keys began this section with a slide show detailing tips for giving Mid and End of Clerkship Reviews. Students Erica Qiao and Brooke Bessen then took the time to discuss giving and receiving feedback during the mid and end of clerkship reviews. They stressed the importance of receiving substantive feedback from preceptors that could reliably reflect their grade. They also mentioned they appreciate when preceptors ask students how they like to receive informal feedback, though it can sometimes be uncomfortable to give feedback in return to preceptors.

Best Practices for New Preceptors

Drs. Joel Carey and Misbah Keen provided many helpful resources for new preceptors who may be teaching students at your clinic. Their slide deck, which you can view here, contains tools like how to best coordinate teaching and expectations among preceptors, using the FM Clerkship website for resources, standard for grading among preceptors, clinical faculty appointment process, and UW library access. For more resources for new preceptors, watch this Mid and End of Clerkship Feedback video and our New Site Director one-pager.

Pediatric Urgent Care Practice Guidelines

Pediatrics Clerkship Director and Associate Professor of Pediatrics Dr. Rebekah Burns gave a presentation on **Clinical Updates: Pediatric Urgent Care Practice Guidelines.** She provided an overview of recent medical literature and identified opportunities to change practice and improve care of common pediatric conditions including: care of the Febrile Neonate, community acquired Pneumonia, and Bronchiolitis. Her slides were adapted from Emine Tunc, MD, Brian Park, MD, and Cassandra Koid, MD.

The Importance of Providing Hope in Medical Care

Program Director of the University of Washington Sports Medicine Fellowship Dr. Ashwin Rao presented on **The Importance of Providing Hope in Medical Care**. He discussed ways to combat burnout, which includes direct and personal engagement with patients, respectful interaction between patient and provider, and better understanding of conditions and treatments.
