## About Miles City:

Miles City was, and sometimes still is – the real Frontier often referred to as the Paris of the West. August 1876 marks the end of thousands of years of wilderness history and the beginning of Wild West. Miles City was at the epicenter of this history and has been immortalized by authors and historic characters alike.

Miles City offers a lifestyle that most people only dream about. It has become the perfect blend of “Old West” and “Up Scale”. We hold true to our roots in western culture, but we also possess the upgraded technology.

Miles City is situated along the vast Montana plains and badlands, where the Yellowstone and Tongue rivers meet, Miles City still retains the air of an old Western town. With its weekly livestock auctions and its annual Bucking Horse Sale for rodeo breeders and stock buyers, the town is a great destination when planning your vacation travel. Make sure to stroll down the main street, where the 1950s come alive. Visit the 1930’s era high school as well as the saloon, renovated to its original 1900s style and the Range Riders Museum.
